

Create/edit a Video Motion Detection recording rule

A Video Motion Detection recording rule records video when a camera detects motion.

To create a video motion detection recording rule using the website:

1. Log into the website.
2. Click **Video**.
3. Click **Recording Rules**.
4. Click **+ Add Rule**.
5. Click to select **Video Motion Detection (VMD)**.
Important: If you do not see *Video Motion Detection (VMD)* as an option, consider creating a *Video Object Detection* rule instead.
6. Enter a name for the recording rule.
7. Select which camera records when it detects motion.
8. Click to select any existing VMD windows using the *in these VMD windows* dropdown menu (if applicable). **Note:**
This option is not available for '25, '26, and '36 series cameras.
9. In *During this time frame*, select the times when the rule can be triggered.
10. In *Minimum delay between camera-triggered clip uploads*, select the desired minimum time between when the rule can be triggered.
11. If desired, click to select any of the options in the *At home settings*. The options include:
 - *Do not record when the system is Disarmed*.
 - *Do not record when the system is Armed Stay*.
 - *Do not record when any of the Geo-Devices are inside Geo-Fence*.
12. In *Video Clip Recipients*, click **+ Add Recipient** to select who should receive notifications.
 - a. Select any entries in the *Address book* to be notified, or click **+ New** to add a new *Address Book* entry.
 - b. Click **Close**.
13. Verify the recording rule is configured with the desired settings.
14. Click **Save Rule**.
